

Secure properties for safer communities

Gated communities, mobile home parks and apartment complexes

Salmon Arm Security offers affordable high visibility patrols and calls to service to keep your property and residents safe and secure. Our uniformed trained officers will patrol your property at random in a marked patrol car as well as on foot, looking for suspicious and unlawful activity as well as any property crime. With our calls-to-service your residents can call our 24hr dispatch to report suspicious activity, property violations or any other security concerns they may have. SAS can also assist property managers in tenant evictions and property emergency situations

Startas

Along with mobile patrols, Salmon Arm Security can also take care of your strata bylaw enforcement. Trained officers can issue such things as parking and noise violation tickets on behalf of the strata council. Patrol officers will look for violations as well as respond to and investigate complaints filed by residents or strata council. Strata management always receives full reports on any situation we deal with.

If any of these services interest you please contact our marketing team today and we will help set up an affordable, professional, custom security plan to fit your properties needs.
